**All data and lines in green refer to vacuum devices,**

---

**Indicates location of water valves, pressure gauges, lines. These are the crossover points from the 6" stainless steel pipes.**

---

**Indicates location of 3" copper 95 degree LCW water electrodes. The database names show the location where the coax (red RG58), with that name, drops down to tunnel from service building. The blue lines show how many devices are connected in each group. Devices are horizontal beam.**

---

**Indicates location of water valves on 6" stainless steel 95 degree LCW water pipes. This water enters/exports tunnel on both ACC & DEB walls by A10/20 drop hatch area.**

---

**For location purposes only.**
